

REMARKS

Claims 9 –11, 15 and 16 were rejected under 35 U.S.C. 102(b) as being anticipated by Goldstein. In response, the present invention was further limited to claim a grip, said grip inline with the spool, disposed on said pole toward said first end. Moreover, the present invention was further limited to claim a stopper, said stopper disposed on said pole toward said second end and said stopper being shorter than said grip, and an arm, disposed partially inside said plug, configured to pivot.

In addition, new claims 16-19 have been added that further limit the present invention by claiming wherein said stopper, said grip, and said spool are not symmetrical when in communication.

No new matter has been entered.

Applicant respectfully believes that the claims are now allowable as further limitations have now been added to clearly distinguish the present invention, as claimed, from the reference.

An RCE has been filed with this amendment and response.

A petition for any and all extensions of time is hereby made and authorization to charge deposit account 500356 is hereby given for all fees due and owing.

Respectfully submitted,

/mlg/

Michael L. Greenberg, Esq.
